Update New Password

Farmer Registration- Aadhaar Verification

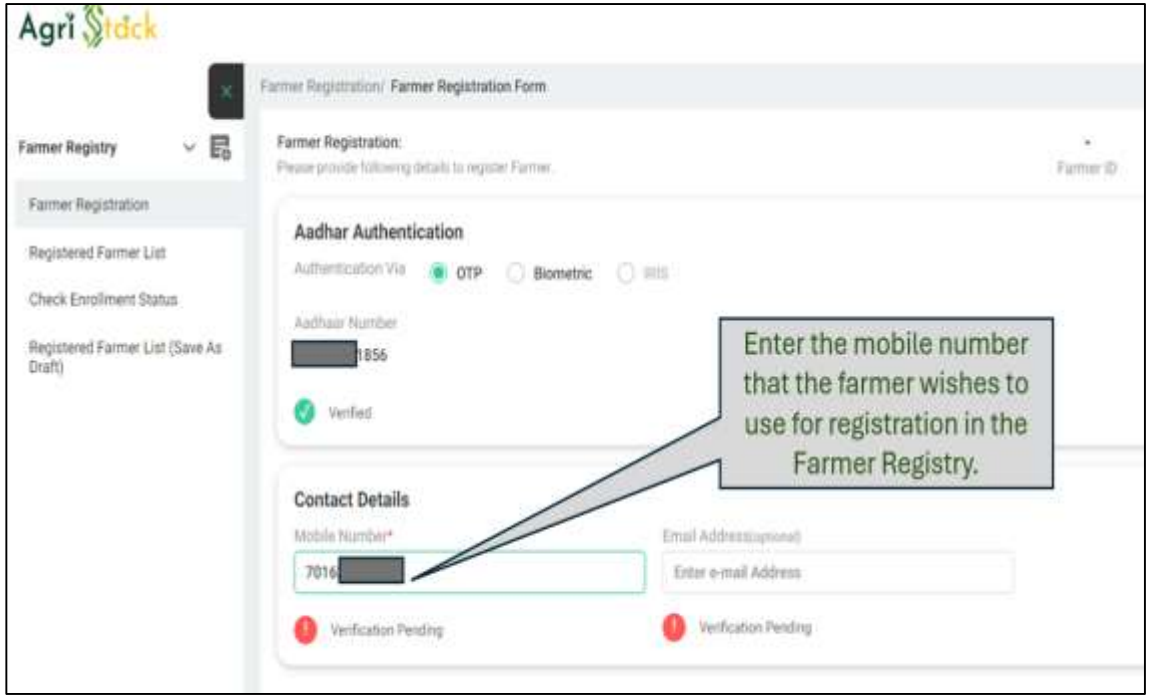

After logging into the account, go to the ***Farmer Registry*** tab and select ***Farmer Registration***. Choose the OTP verification option and enter the farmer's Aadhaar number to proceed with eKYC. The image below illustrates this process.

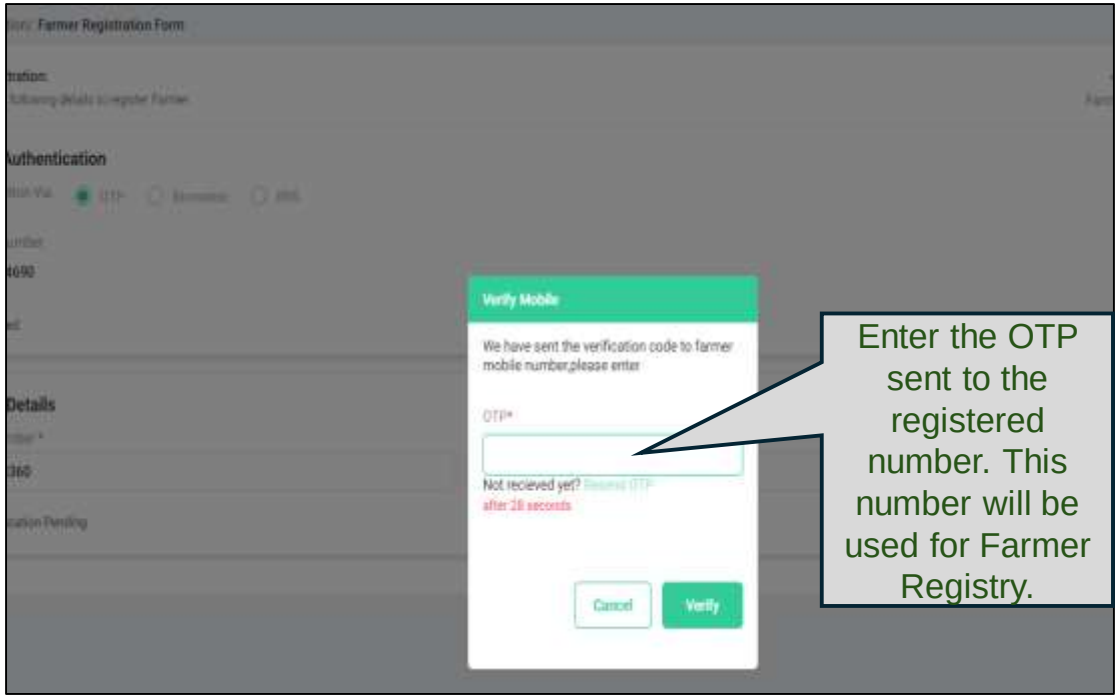

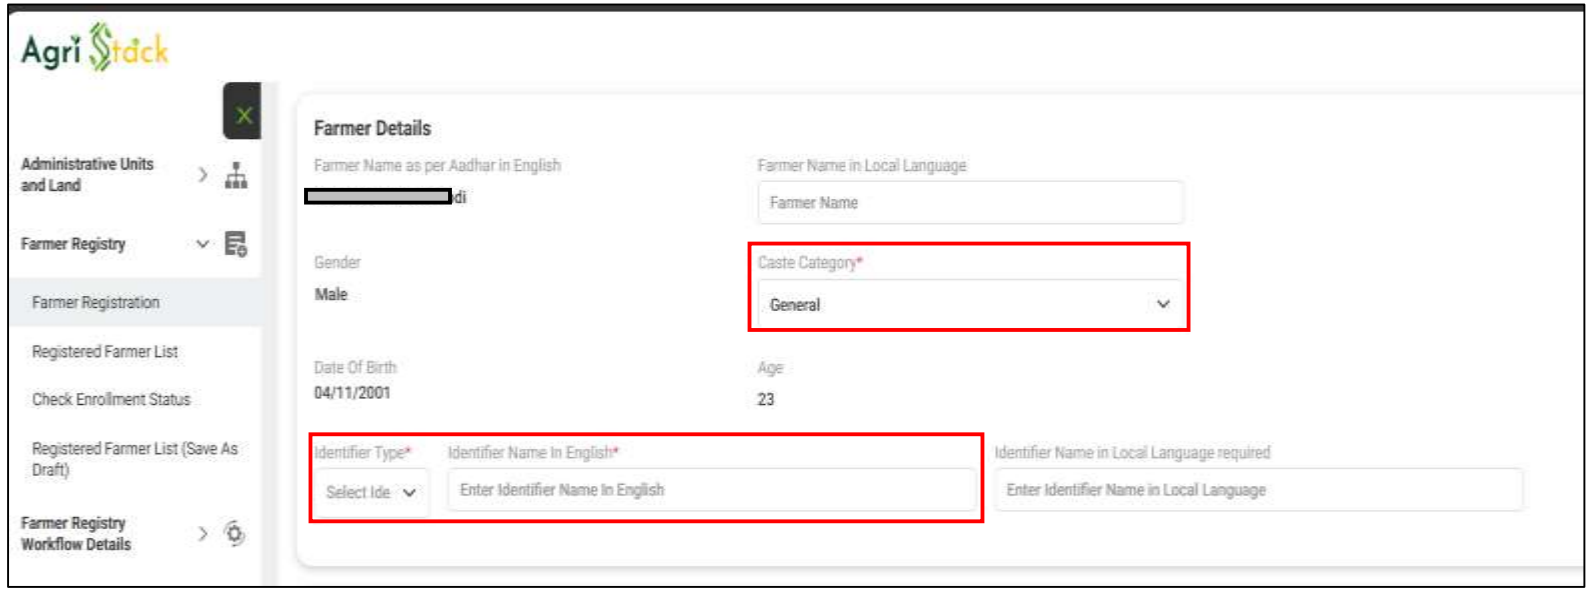

Enter and Verify Contact details for Communication

Enter the mobile number that the farmer wishes to use for receiving Farmer Registry information and updates, and verify it as shown in the images below.

Farmer Details & Residential Details

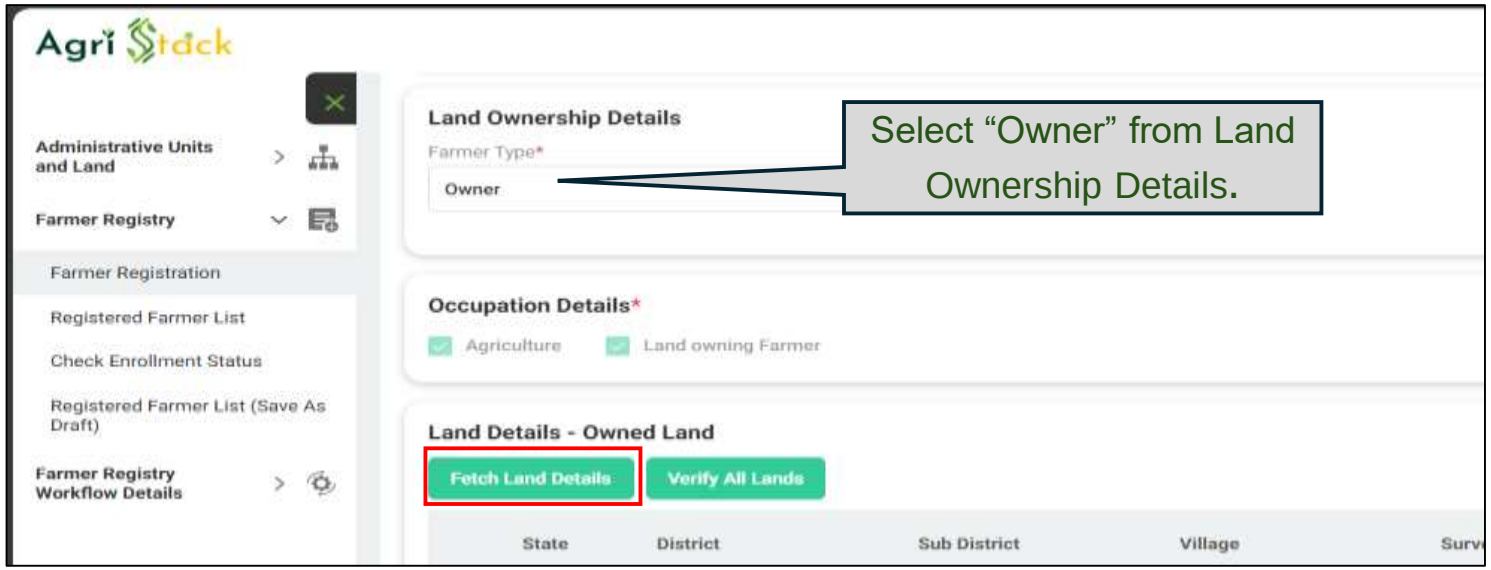

After verifying the mobile number, the system will display the farmer's details fetched from Aadhaar. The operator must enter the following mandatory fields:

- **Caste Category**
- **Identifier Type**
- **Name**

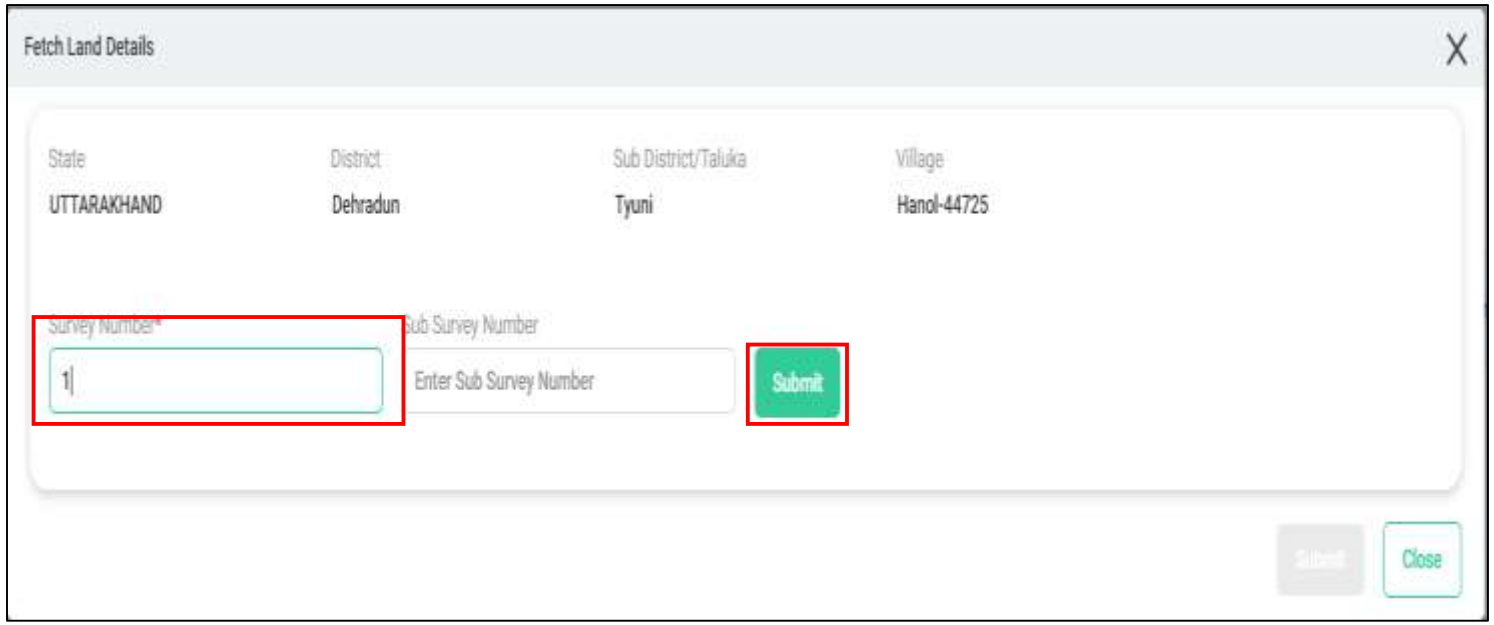

Similarly, residential details will be fetched from Aadhaar. If the farmer wishes to update the address, the operator can check the 'Insert Latest Residential Details' checkbox, which will allow entry of the latest address of Residence.

Farmer Land Details

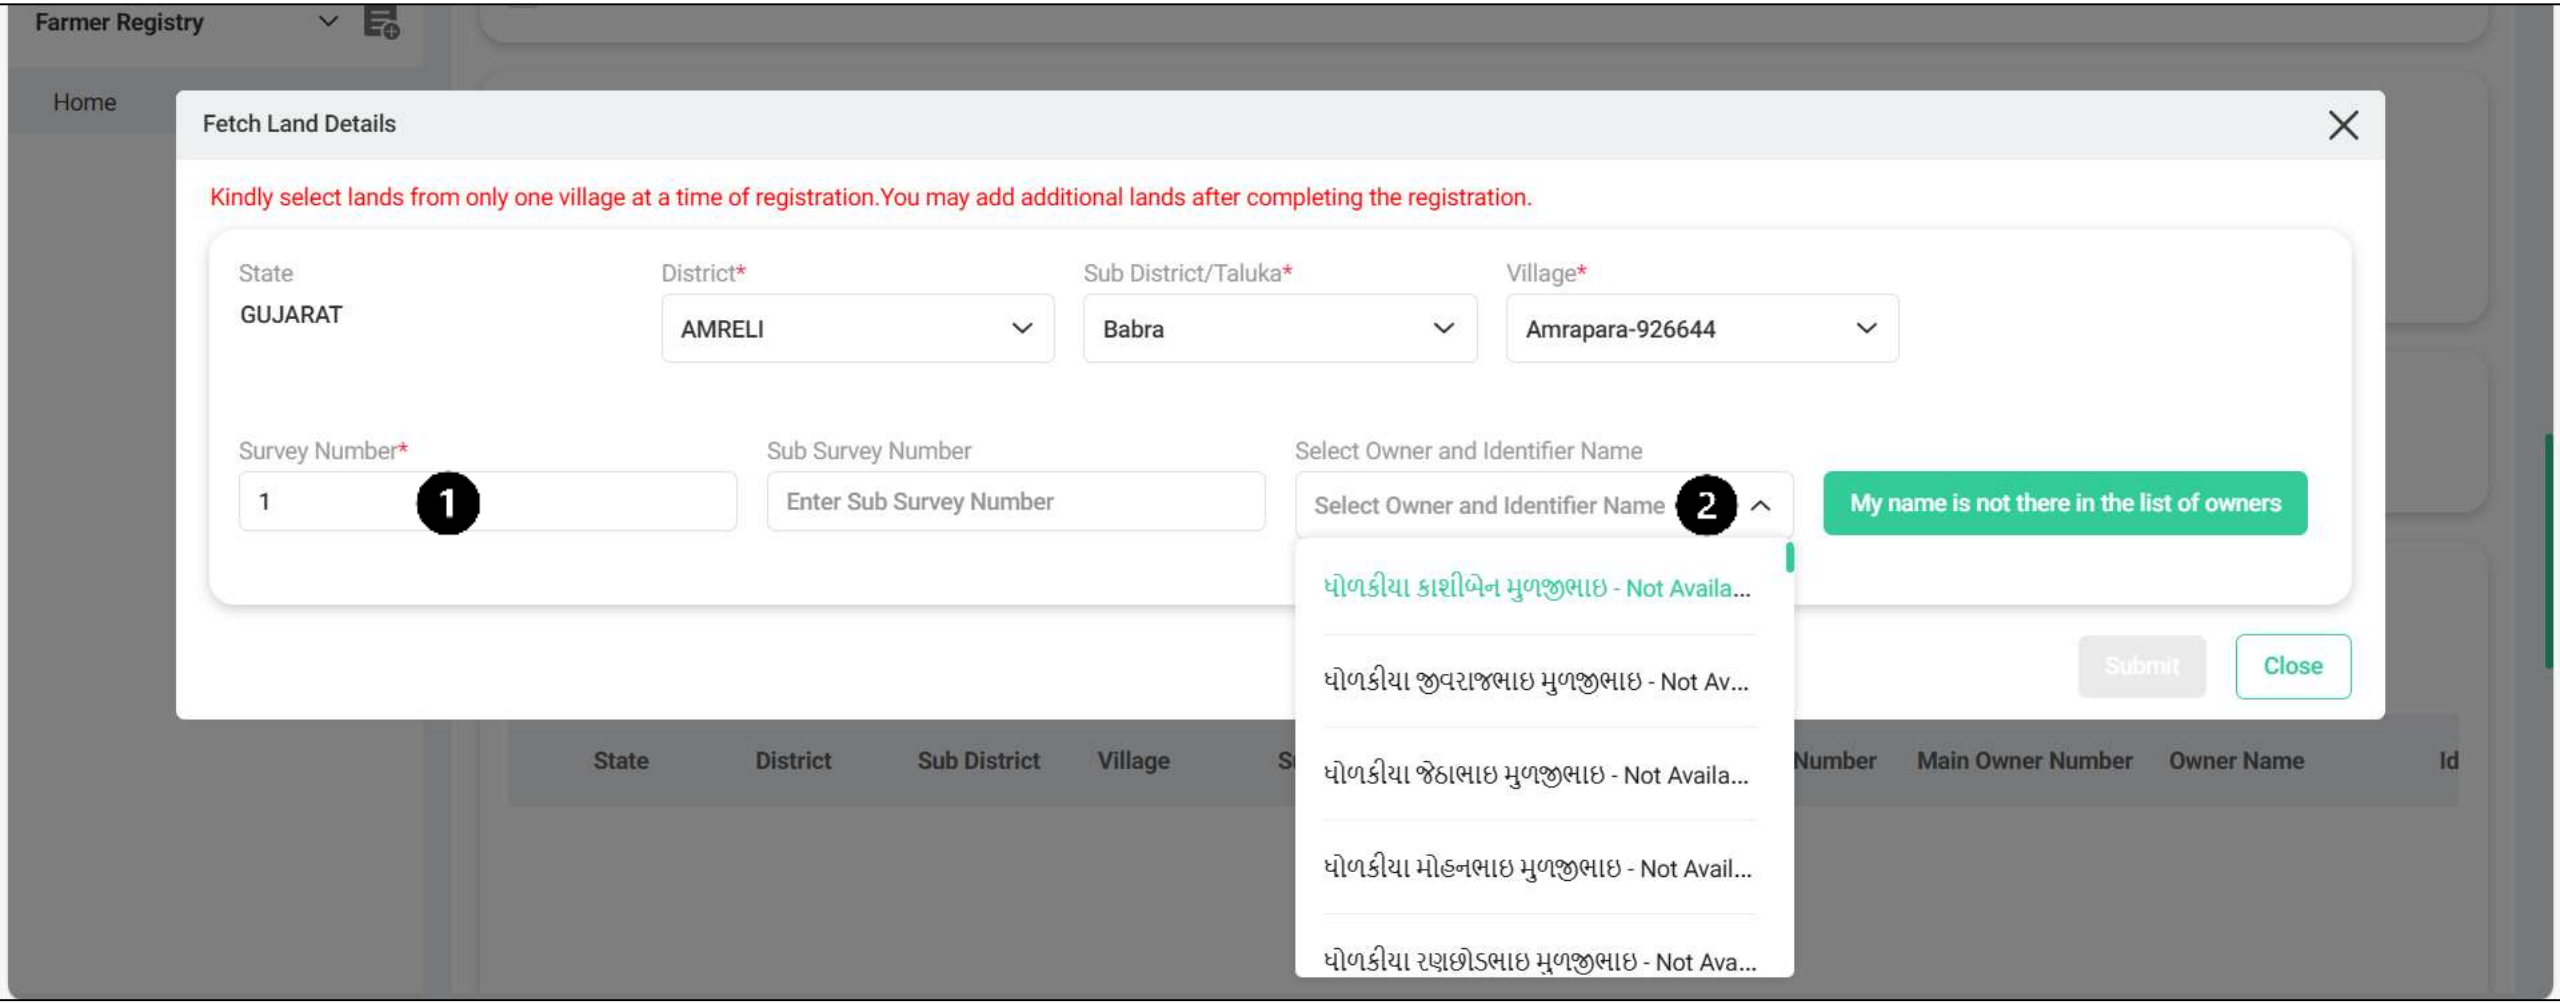

Select ***Owner*** under Land Ownership Details and then click on ***Fetch Land Details***, as shown in the image

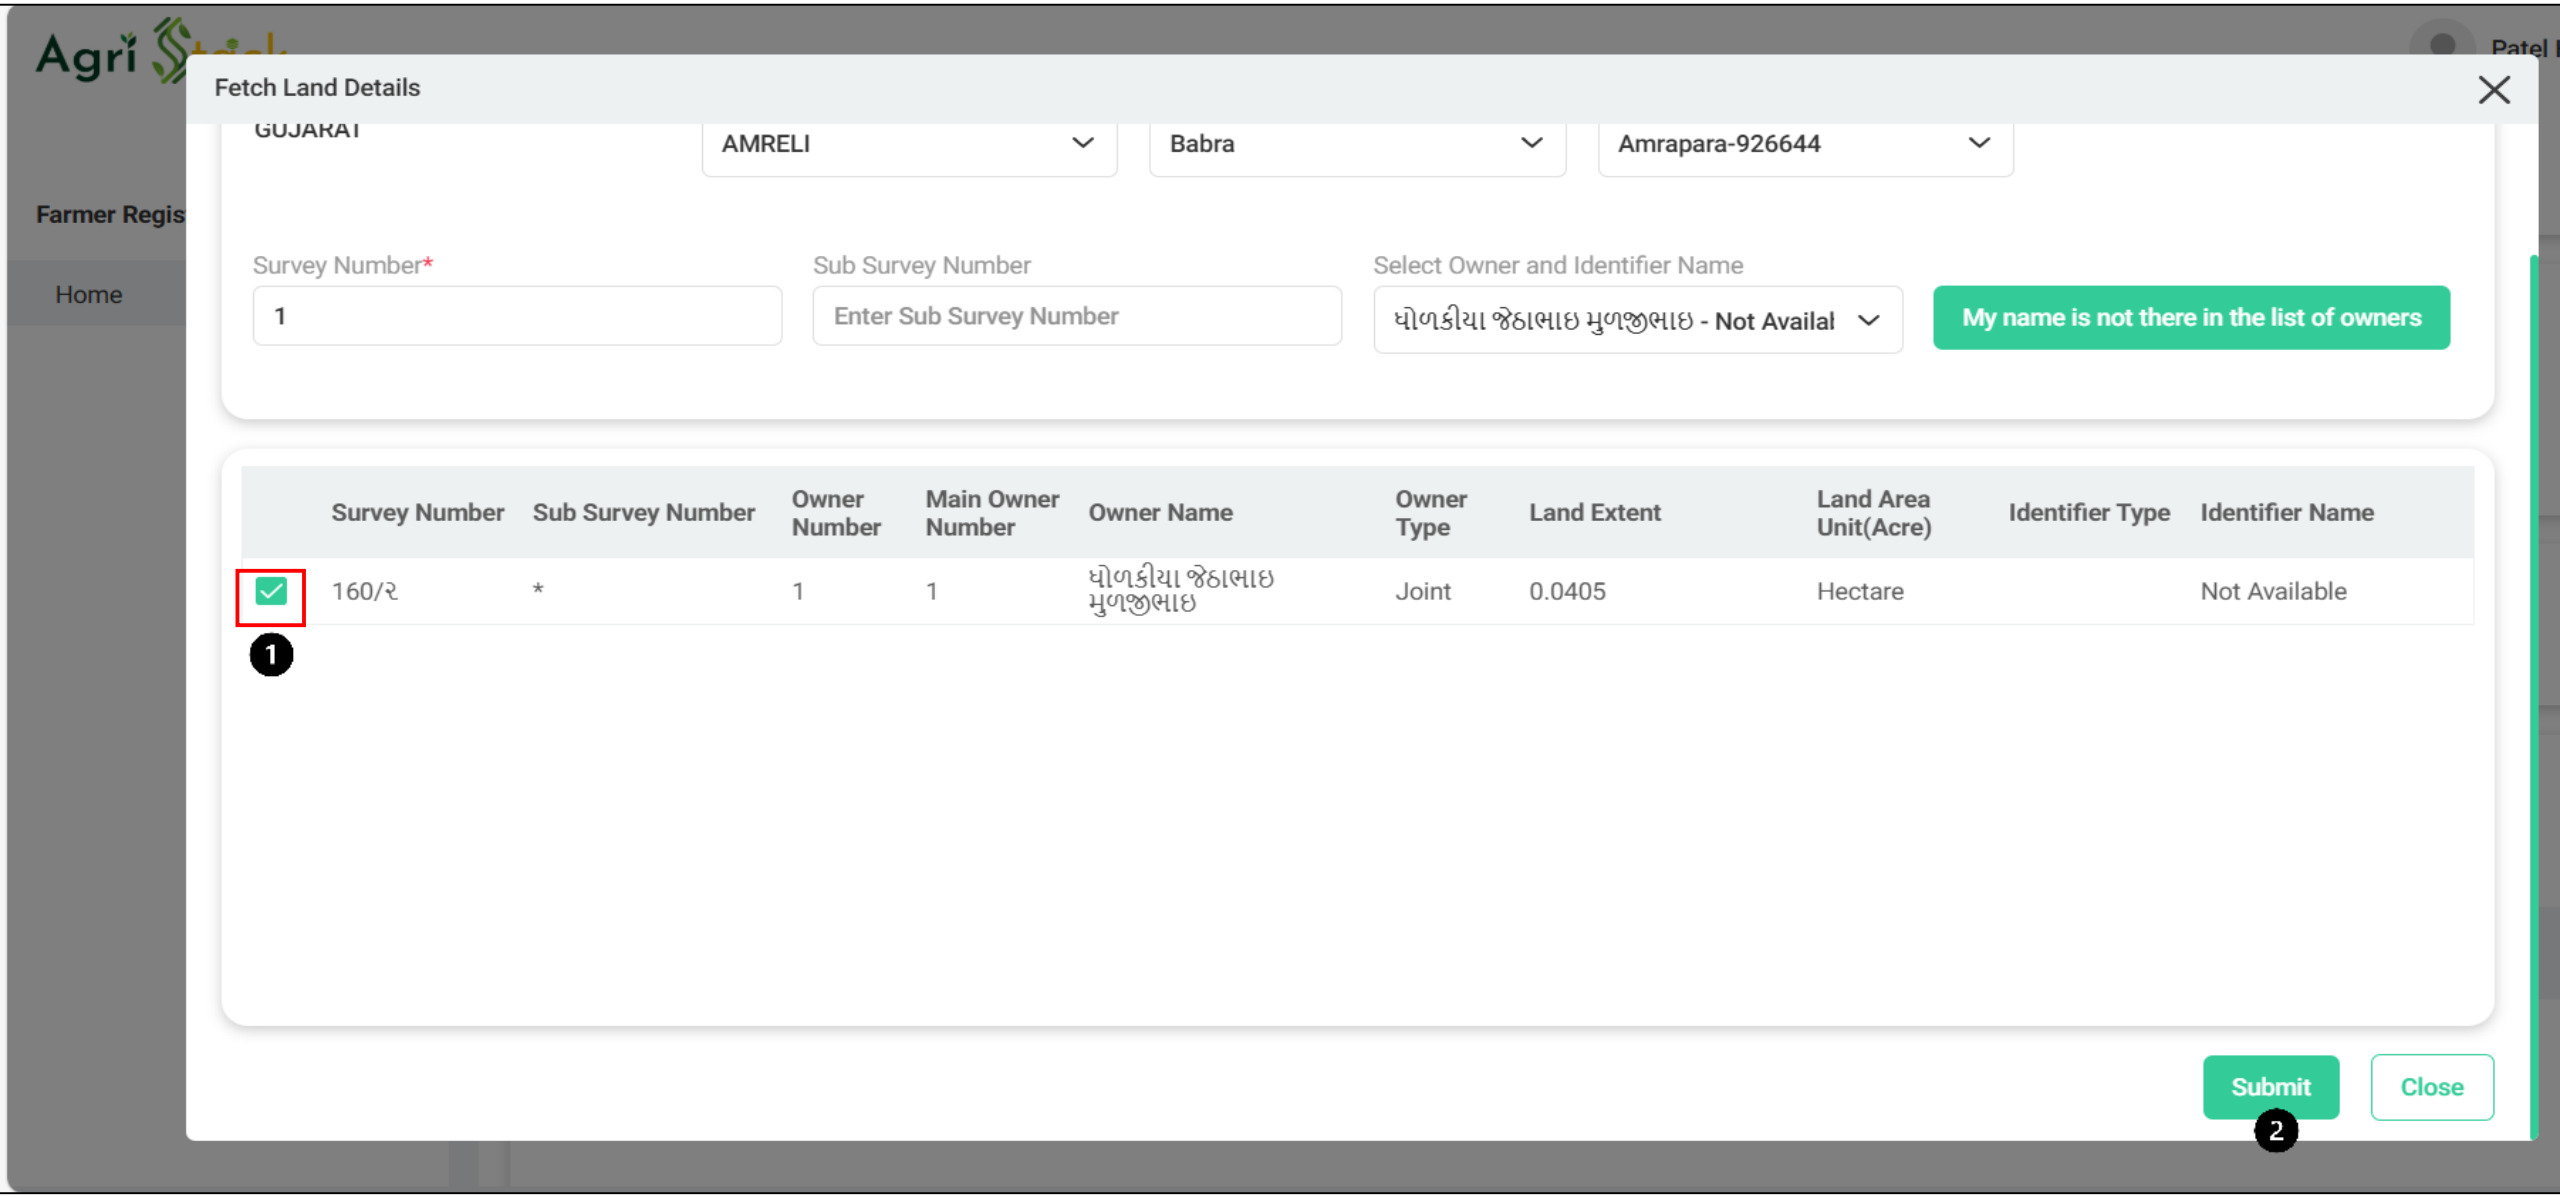

Enter Survey Number and click on Submit

Land addition using SFDB Bucket

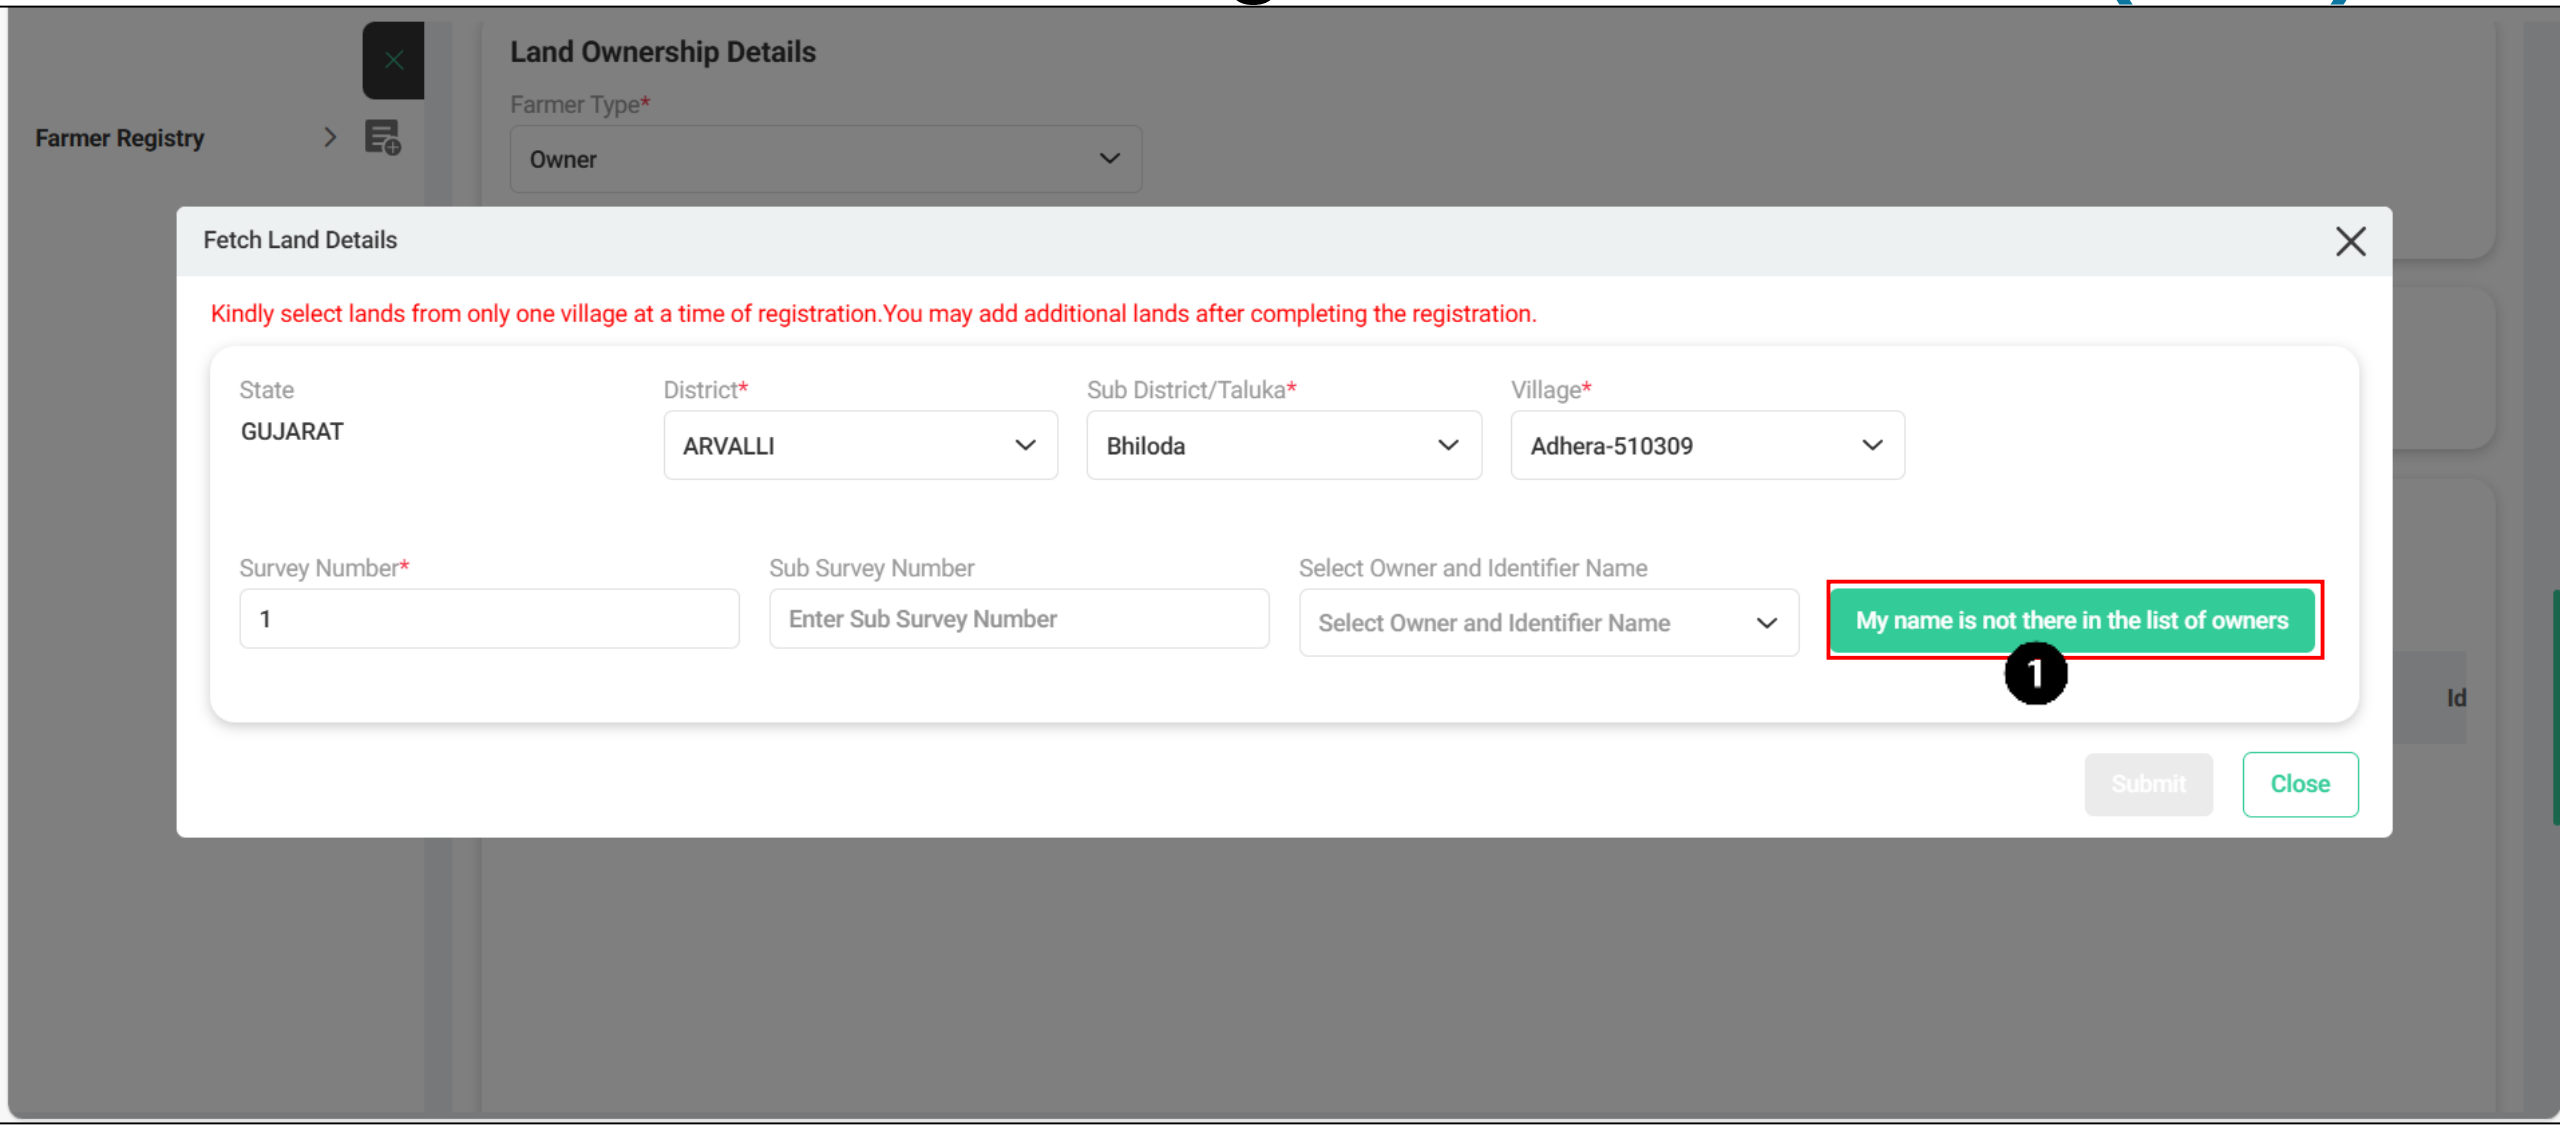

- **Select the Correct owner and Identifier name combination from the dropdown.**

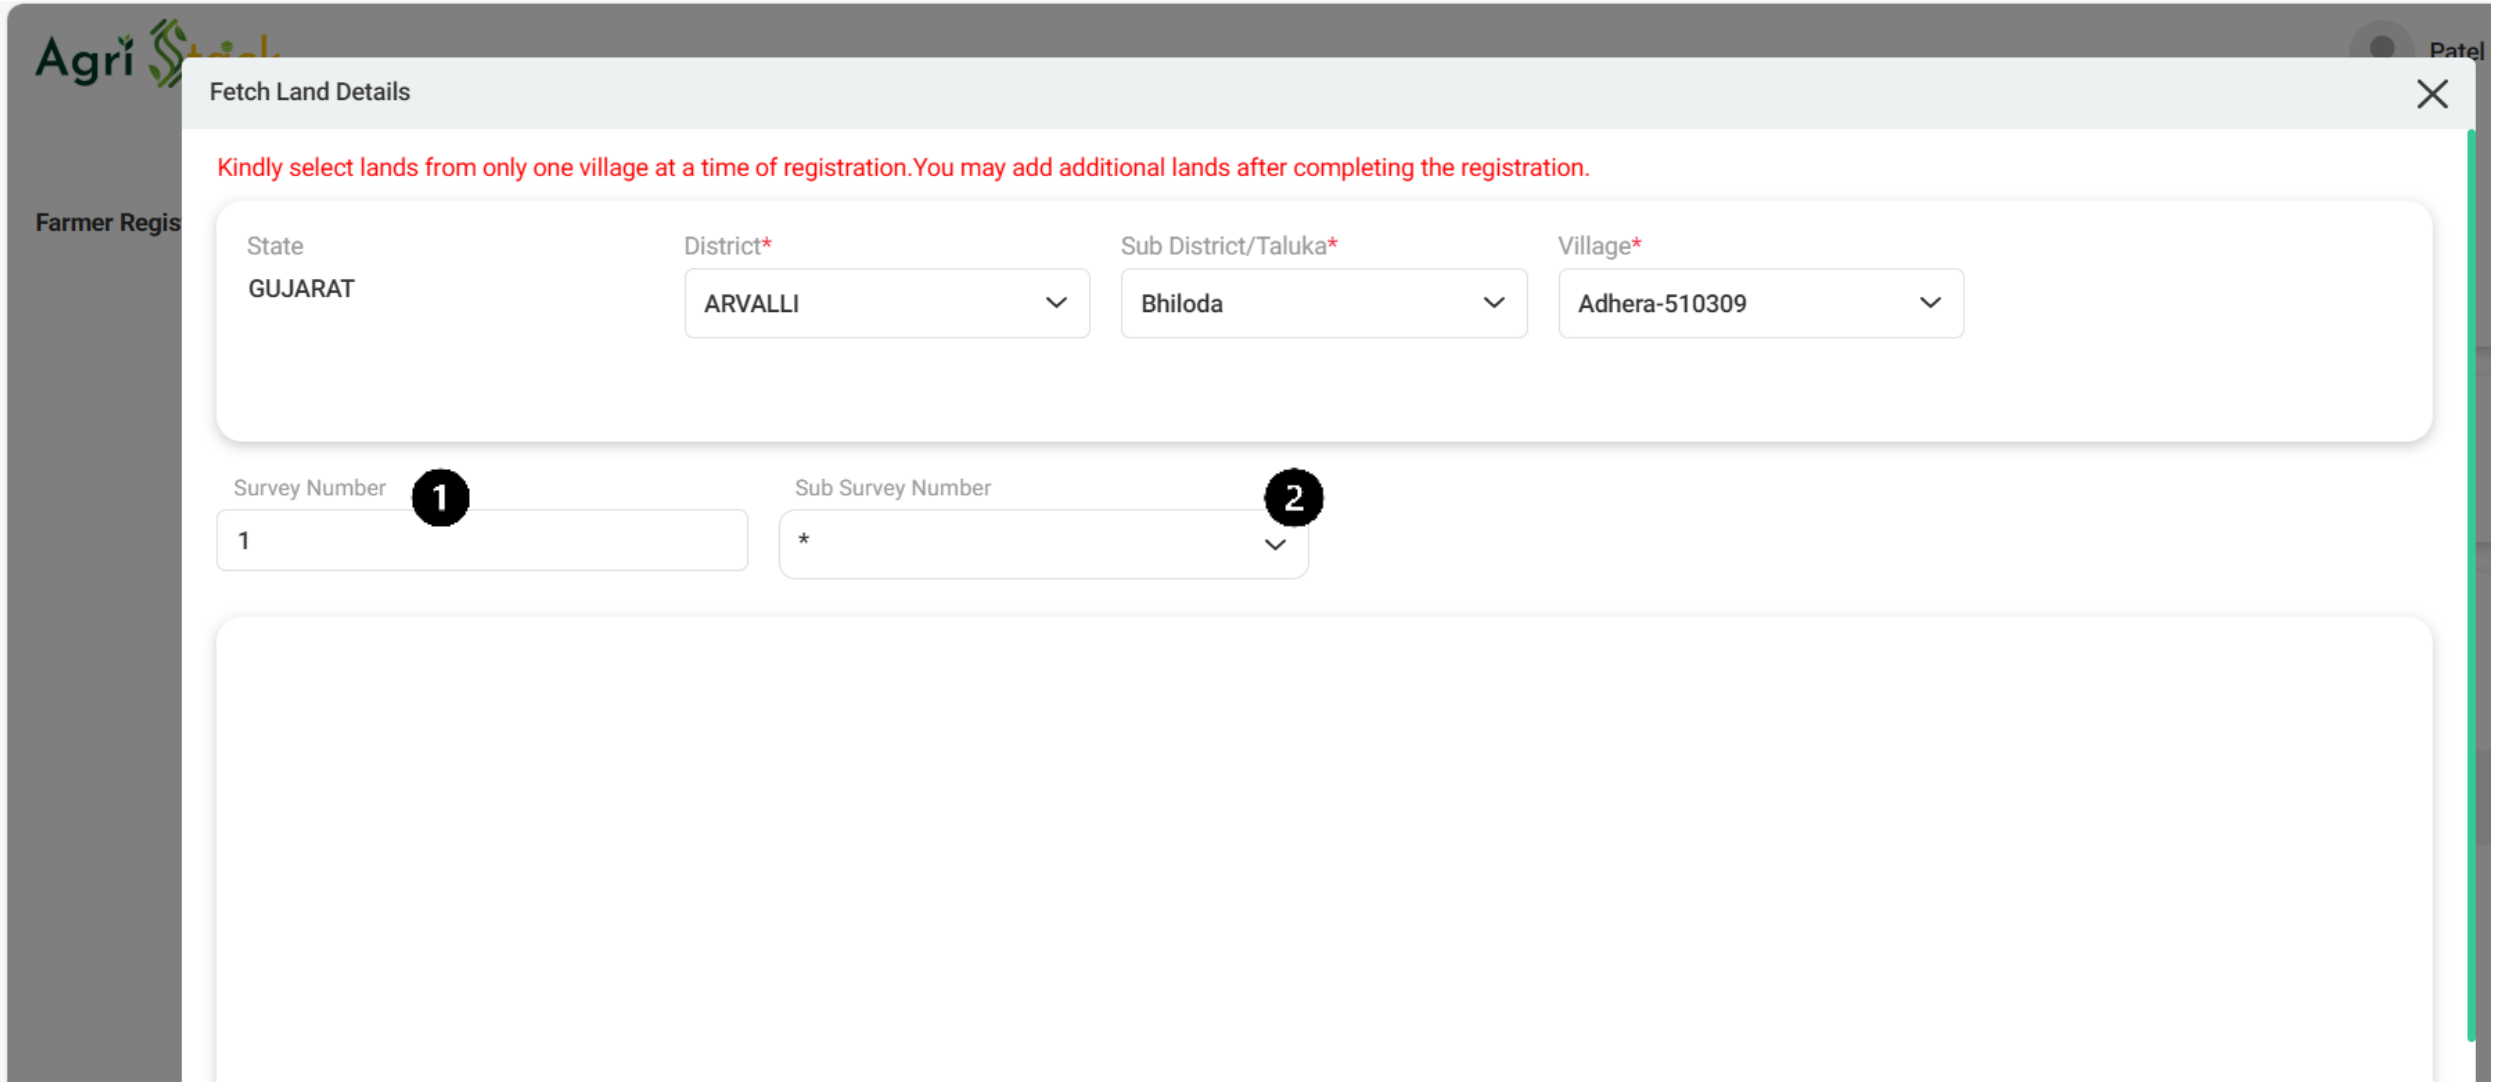

- **Select all the lands of Farmer in the village and click on submit**

- In case Farmer-Identifier name or any land of farmer is not available in the list or you are unable to access records, then try to add land using Unified land API as shown in below slides.
- Repeat the process of land addition via the method illustrated below until you add up all the lands of farmer in a village.

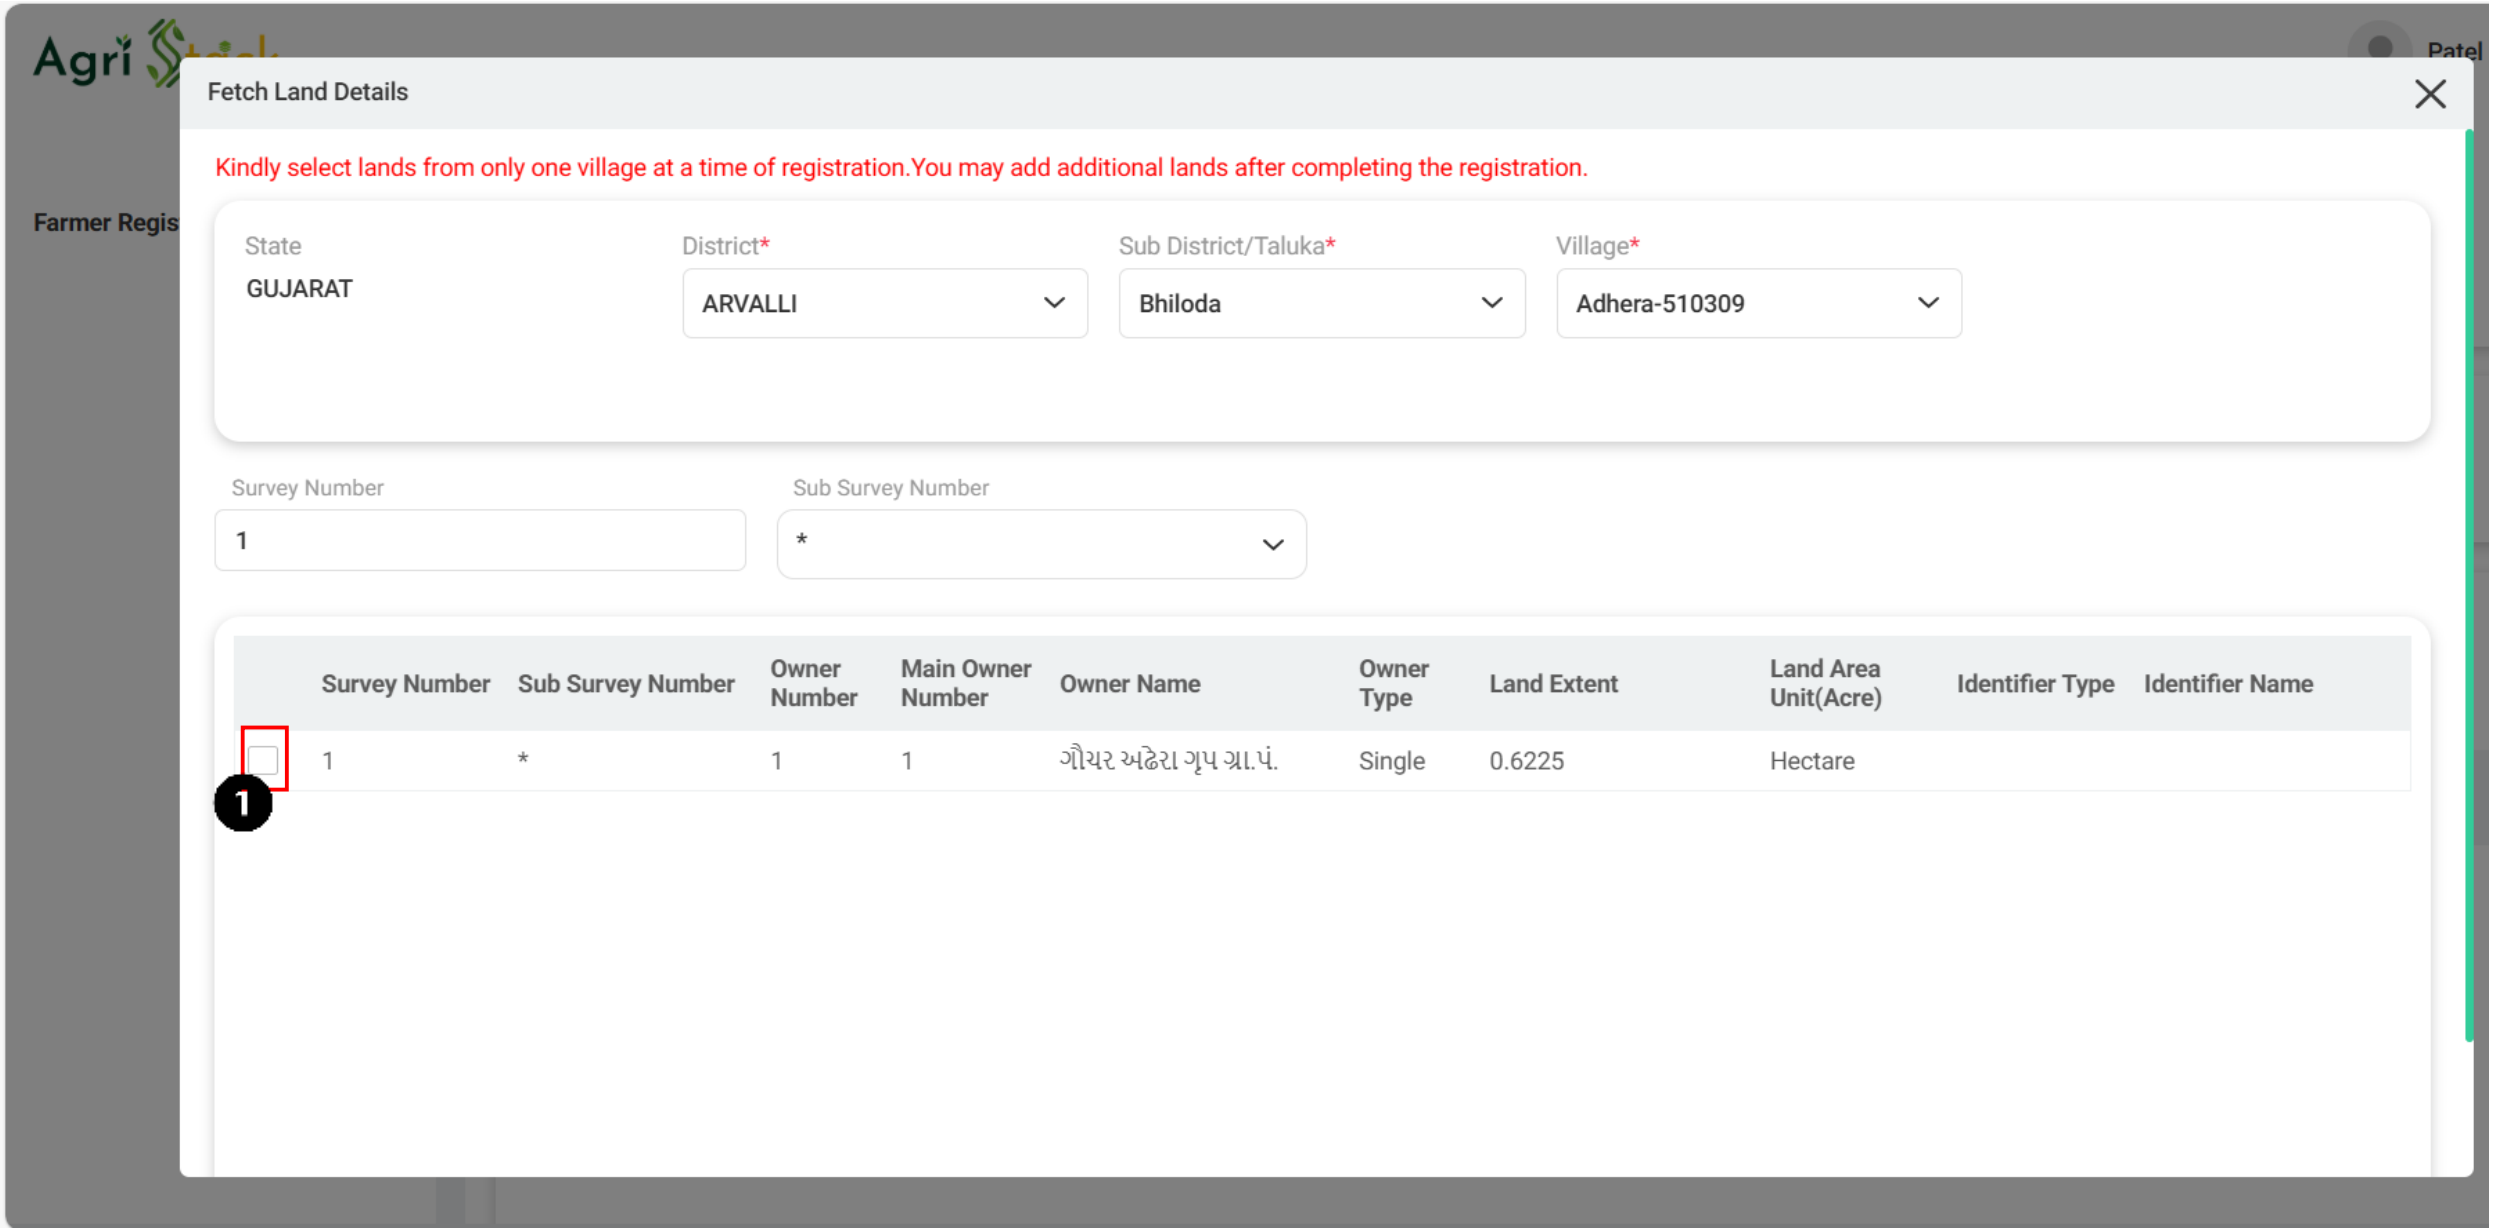

Land addition using Unified Land API (RoR)

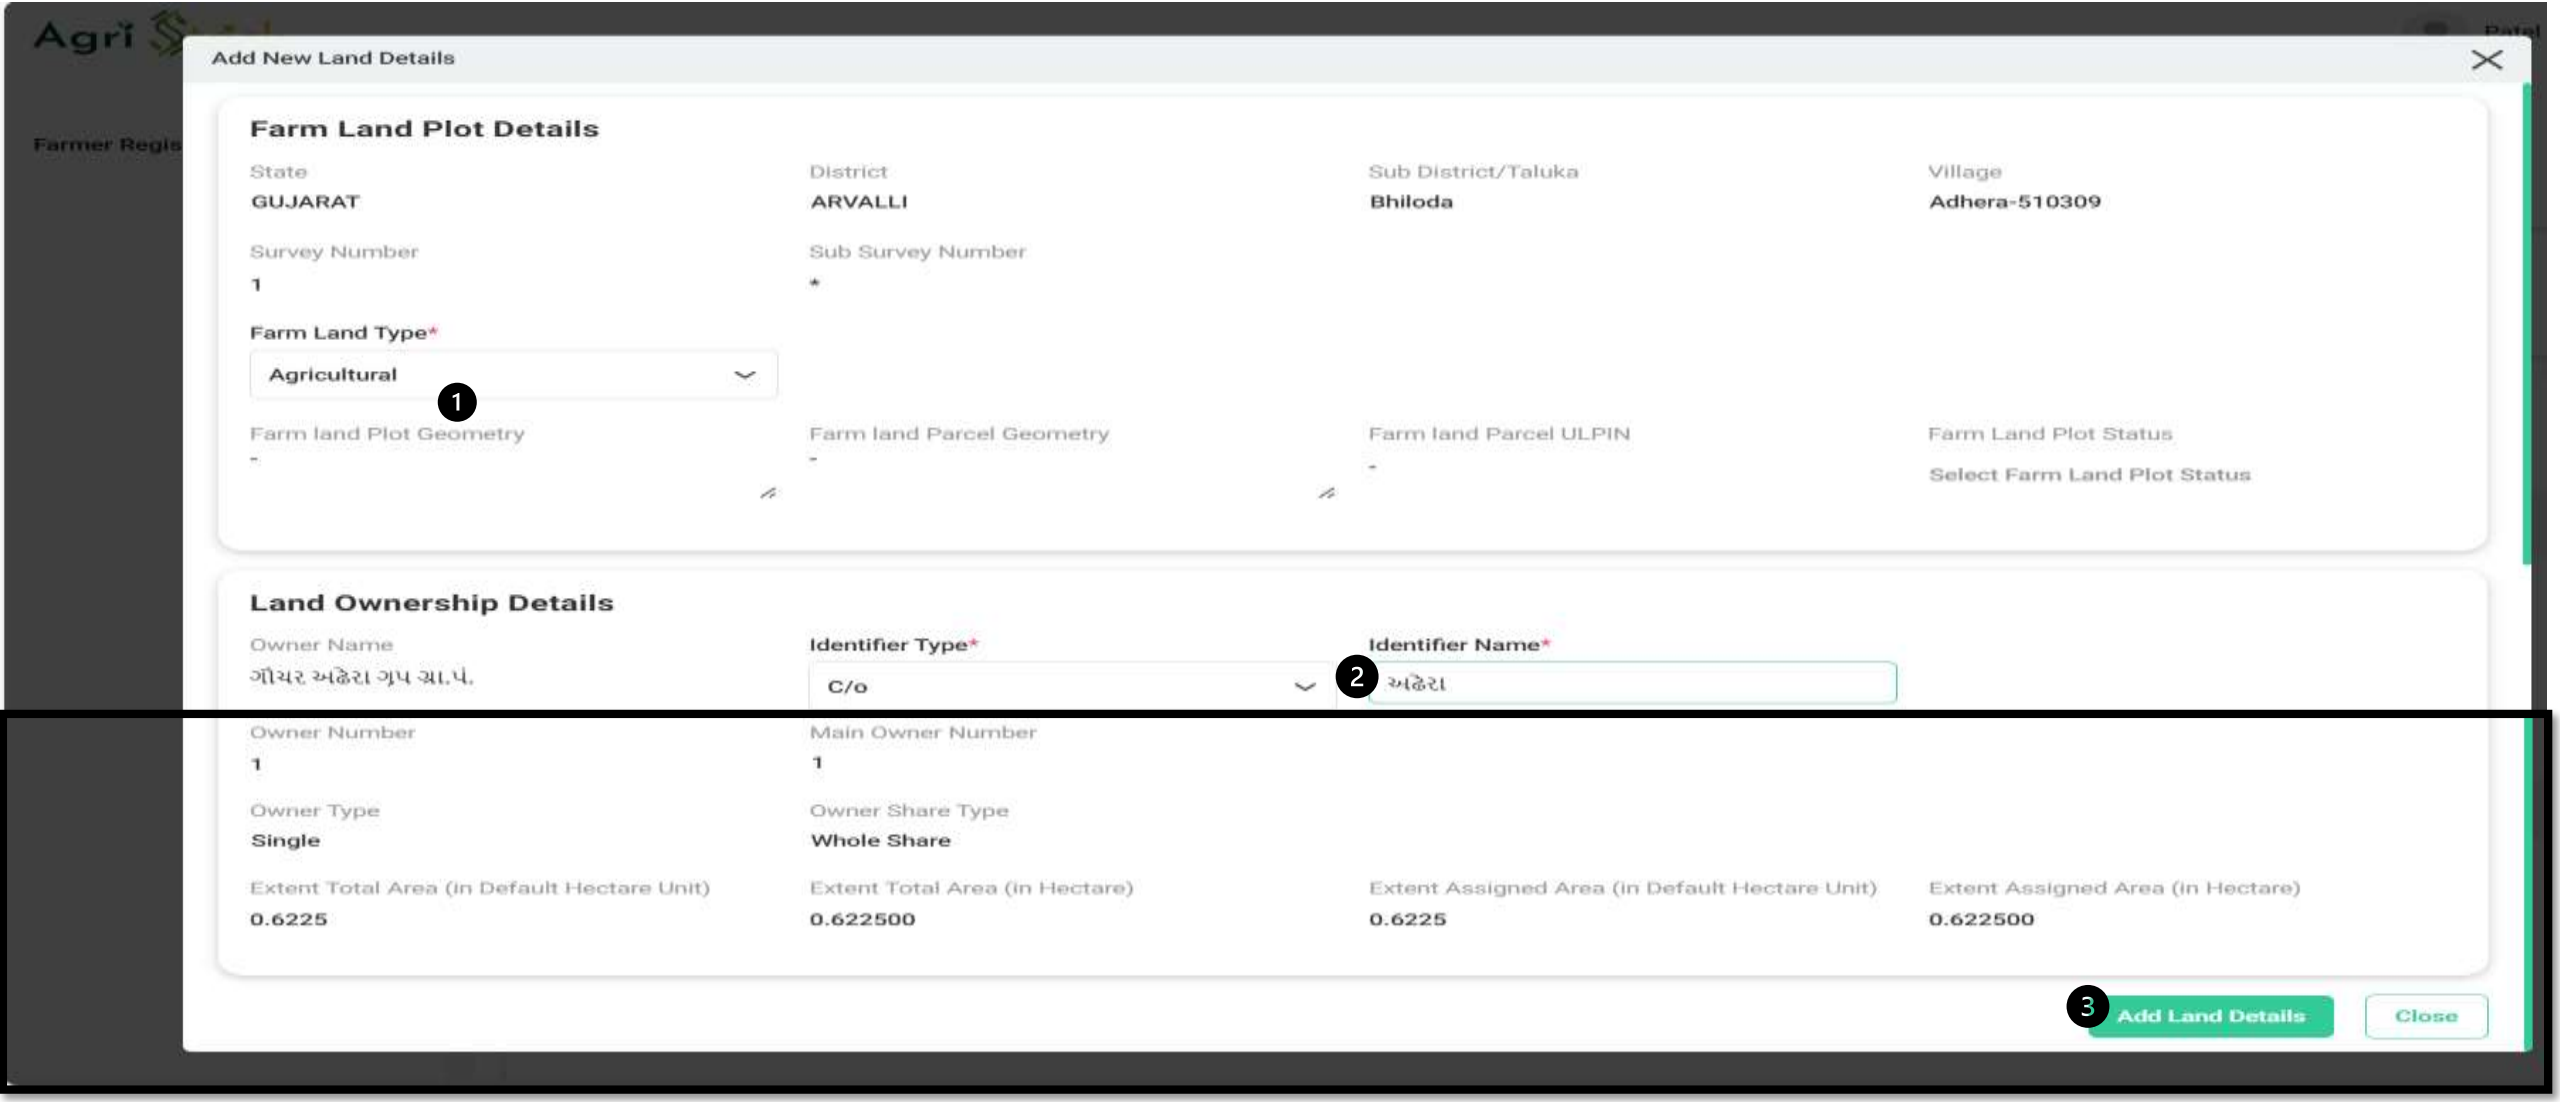

- Click on “My name is not there in the list of owners” option.

- **Click inside the survey number field then select star/sub-survey number in “Sub Survey Number” dropdown.**

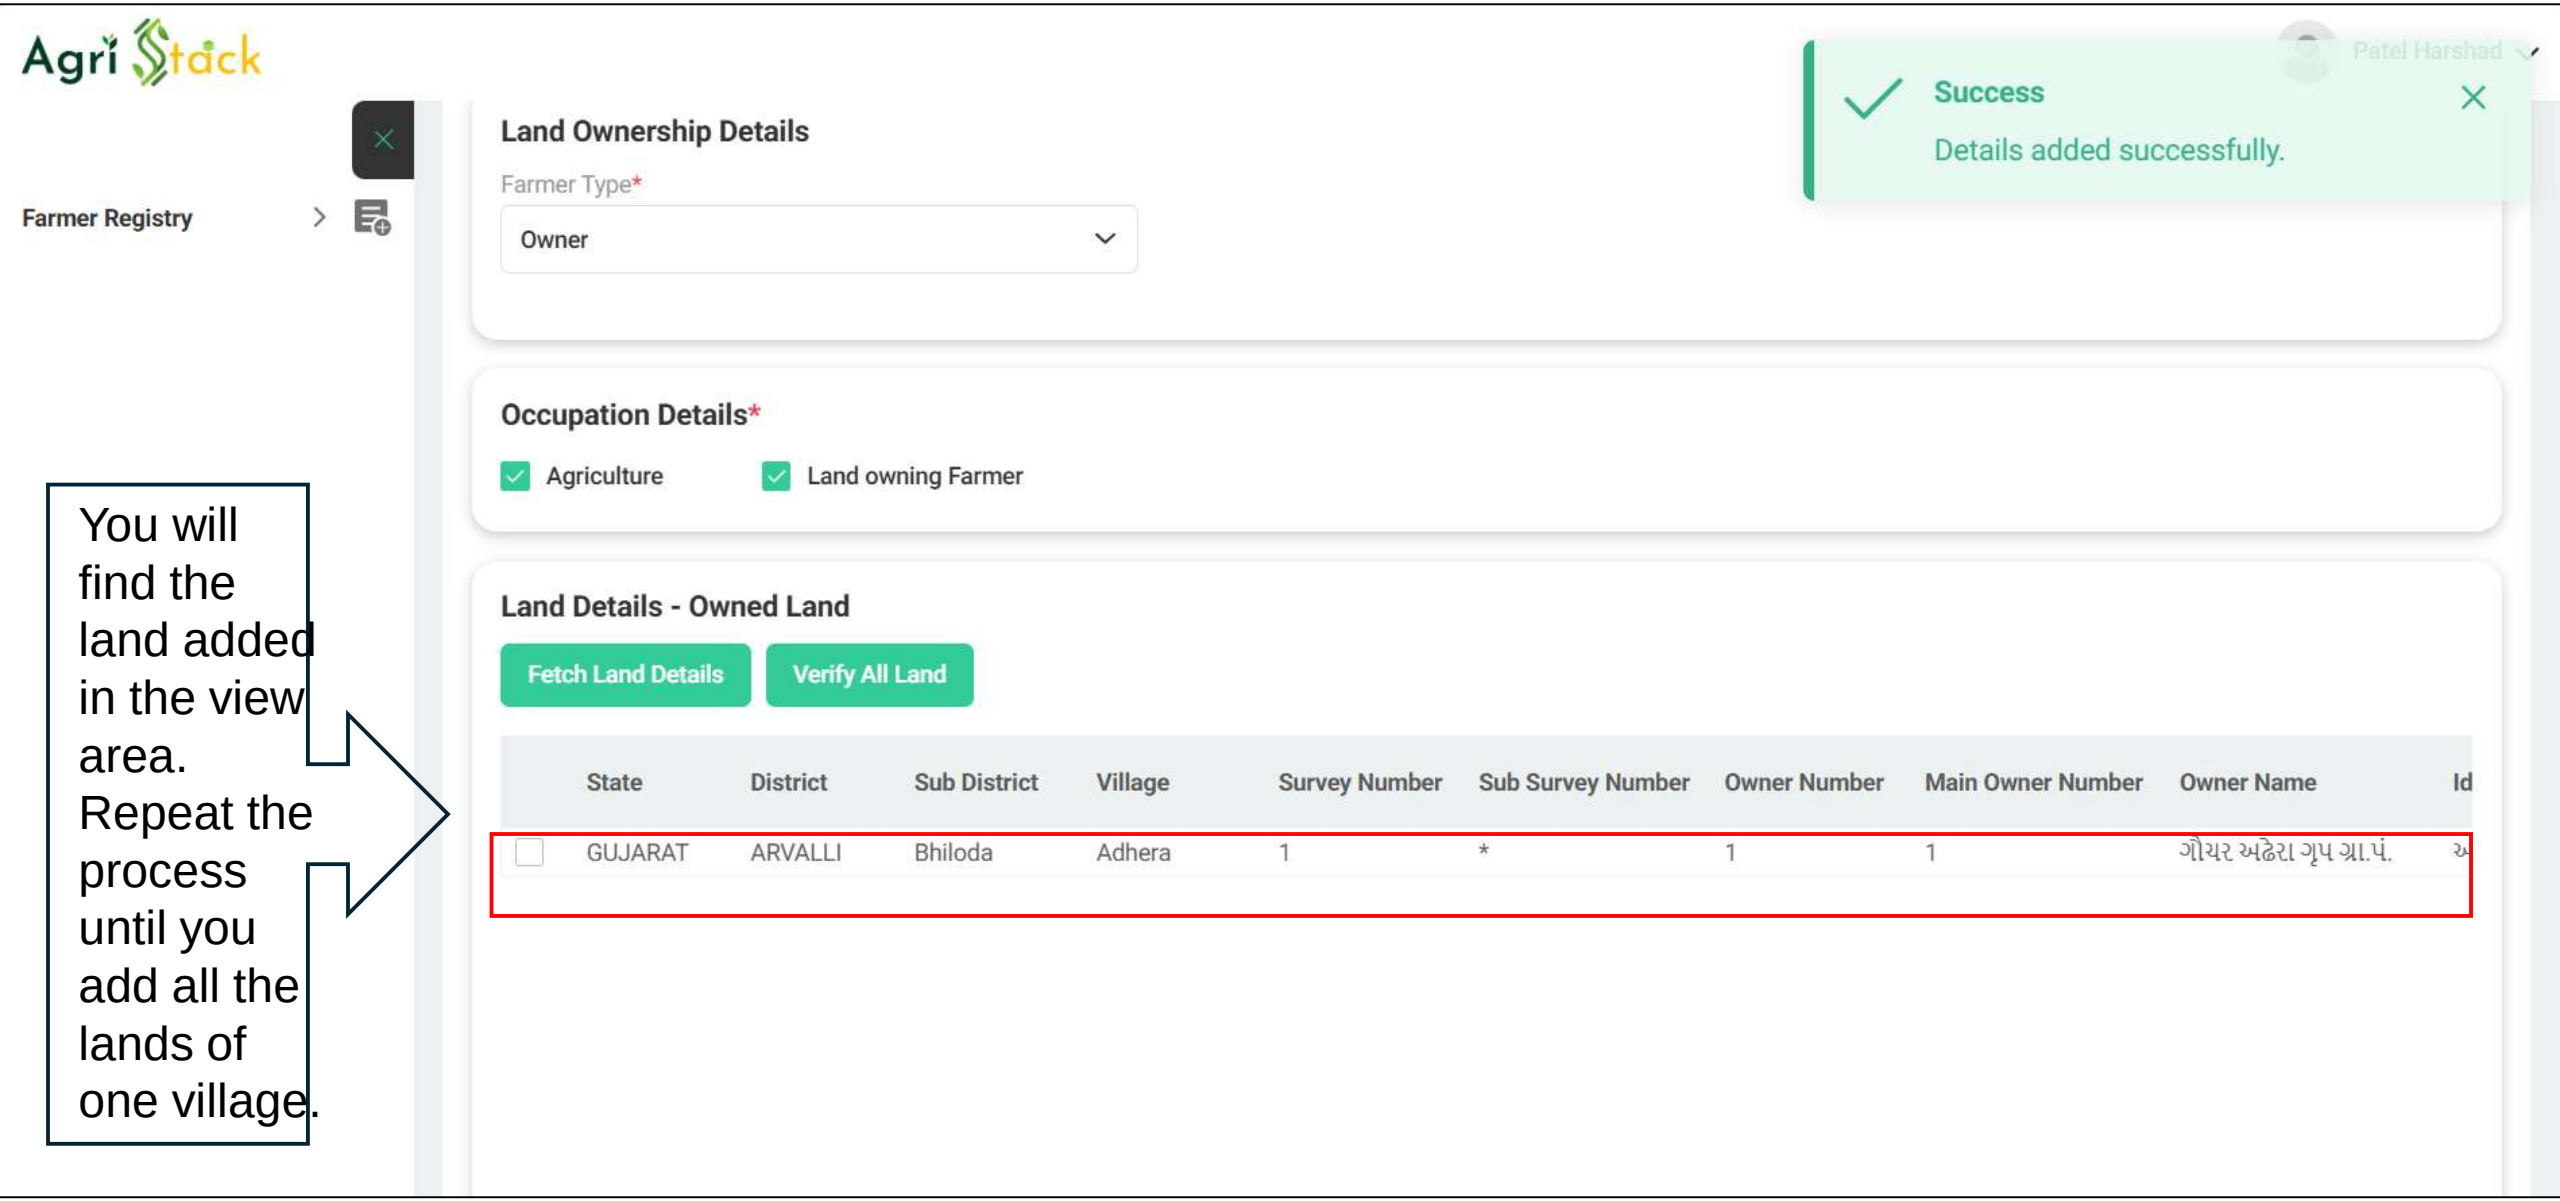

- **Select the correct land of farmer to be added.**

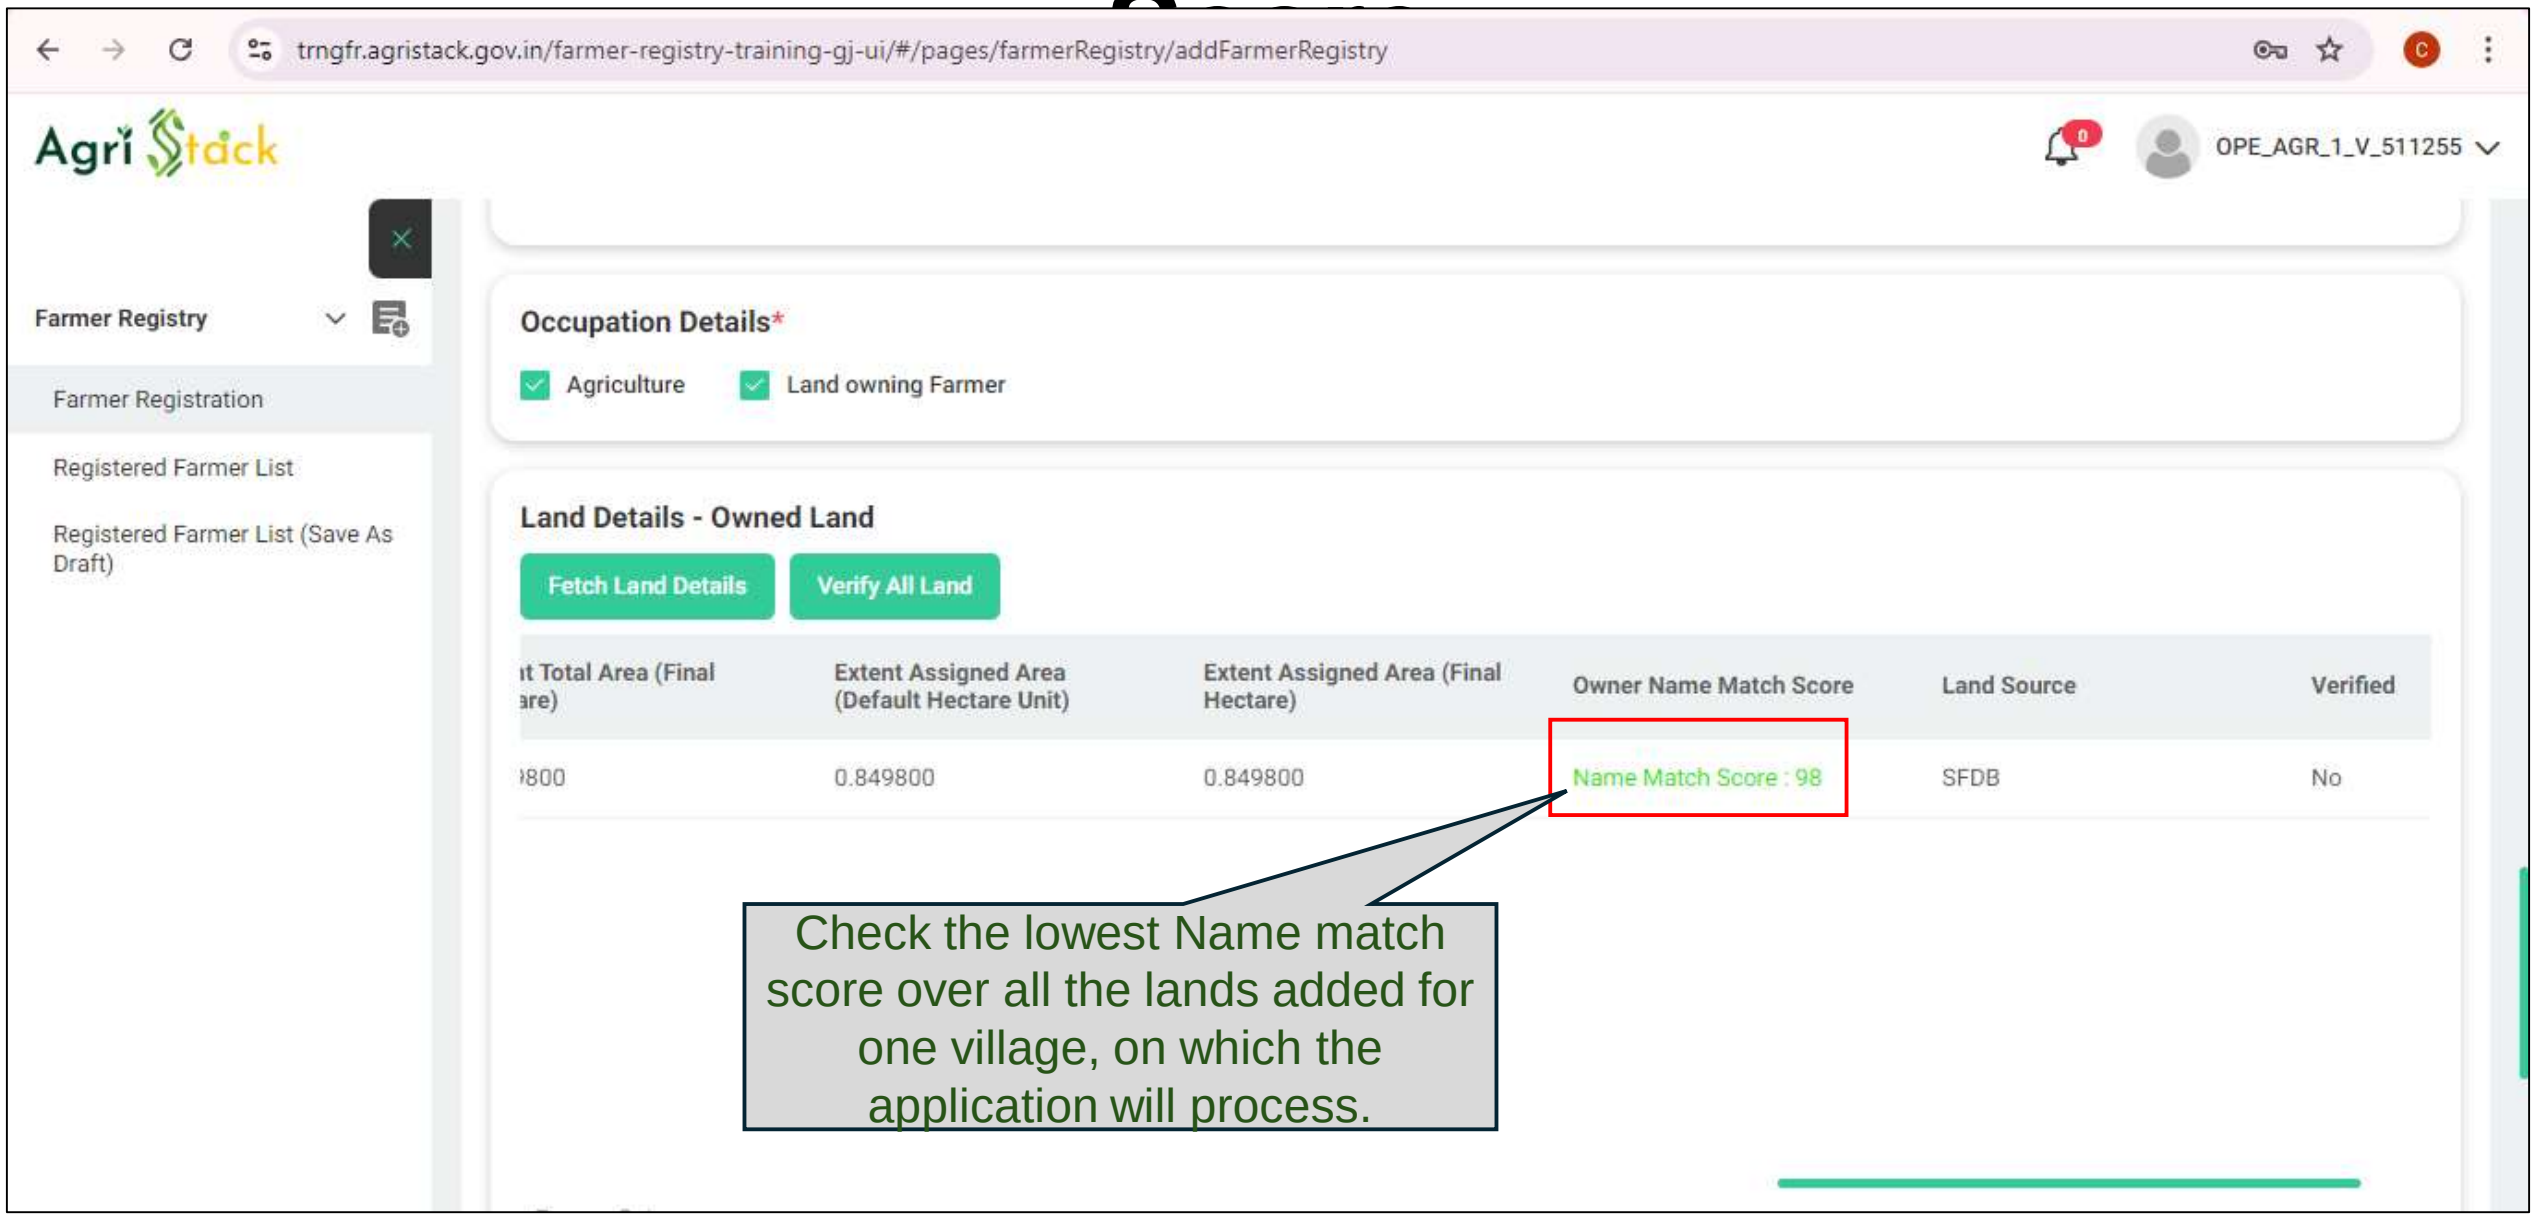

- **Select “1” and enter the required details then Click on “Add Land Details”, repeat the process until you add all the lands of one village.**

Land Details Successfully Fetched

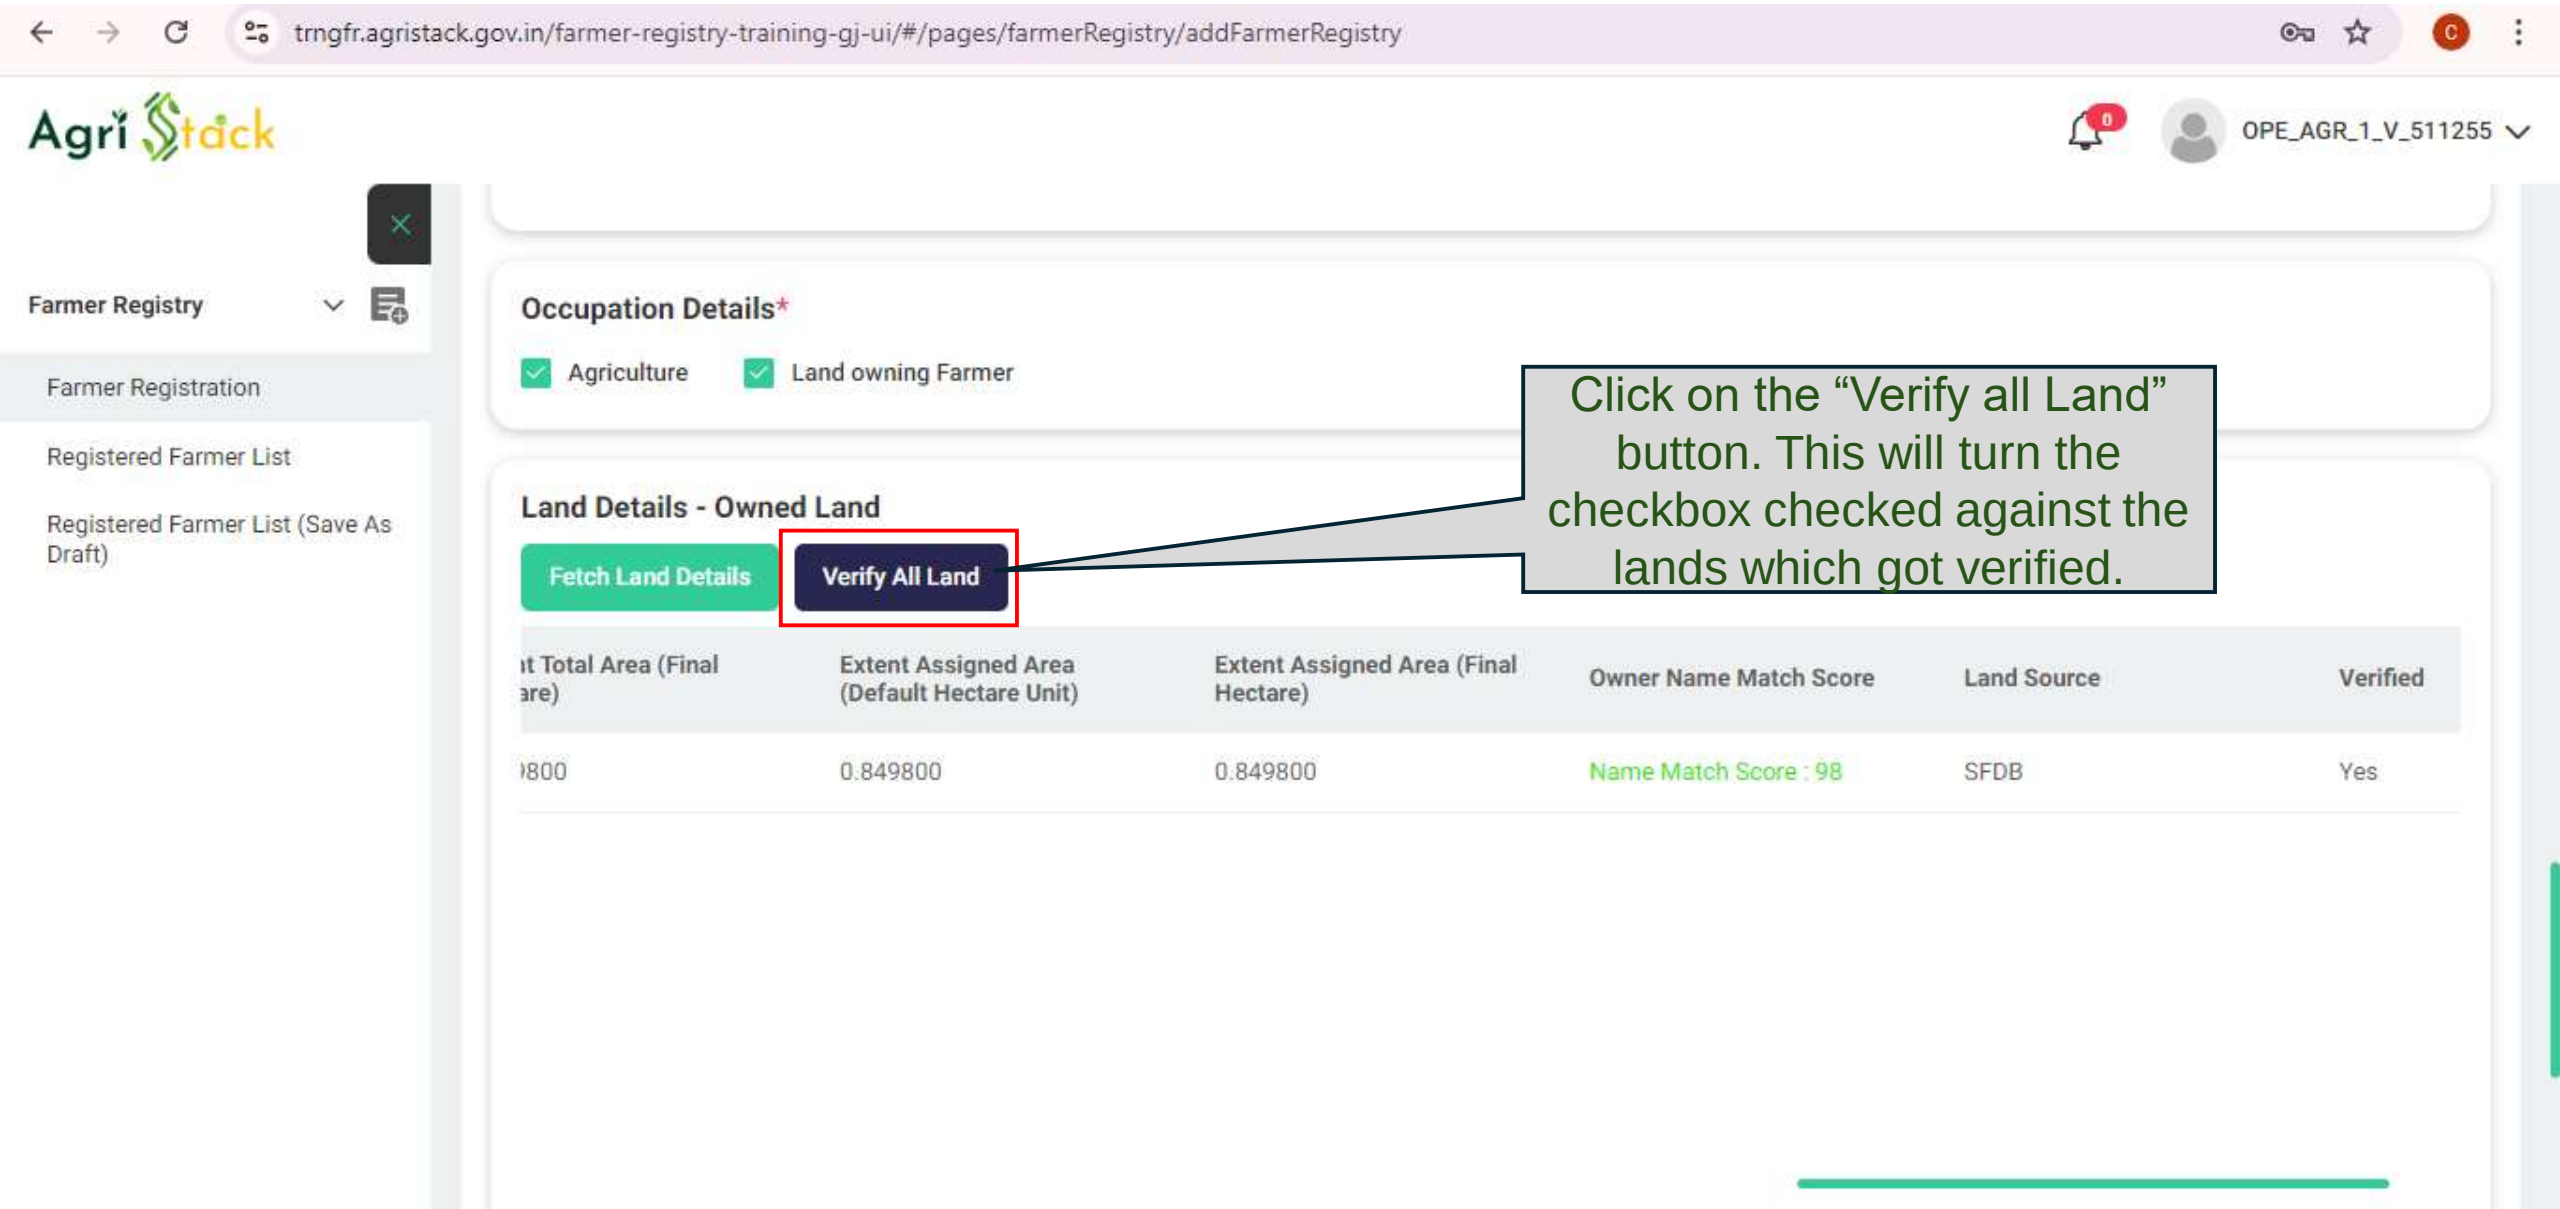

You will find the land added in the view area. Repeat the process until you add all the lands of one village.
